Risk & Legal Assistance	Investment & Finance	Fleet & Service Management

Platform

1 Premise Solution (On/Off-Premise)

- Deploy resources for IT/ERP solution
- High-regulated with extra privacy concerns
- Extra-sensitive information and credentials
- Service Extension and Migration

2 Software-as-a-Service (SaaS)

- Gain access to sophisticated applications
- Use free client software
- Mobilise your workforce easily
- Access app data from anywhere

3 Infrastructure-as-a-Service (IaaS)

- Users have to pay for the resources
- Expansion of capacity and scalability
- Ensures affordable and faster to market
- Abide by the security protocol network

4 Cloud-as-a-Service (CaaS)

- Consistent infrastructure, Operations, Service
- Provides hybrid clouds and server computing
- Automate and secure across multi-clouds
- Rapidly scale and increase speed-to-market

5 Database-as-a-Service (DBaaS)

- Allows the provision for more resources
- Delivers a flexible full-time monitoring platform
- Manage benchmark configurations
- Leverage existing servers and storage

6 Device-as-a-Service (DaaS)

- Outsourcing procurement and lifecycle management
- Handling sales and automatic D2D management
- Manage global coverage and synchronized delivery
- Reduces workload to configure devices and scale-up

Platform

(7) **Automation-as-a-Service (AaaS)**

- Identify potential RPA use cases and Report
- Feasibility analysis of the existing toolset
- High-level process scan & Scope requirements
- Customized OCM enablement
- Deepdrive workshop training assessment

(8) **Digital-as-a-Platform (DaaP)**

- Responsible to enable virtual interaction
- Frictionless business model
- Collective intelligence / User adoption
- Easy access and governance
- Create omnichannel ecosystems

(9) **Innovation-as-a-Culture (IaaC)**

- Idea evaluation and realization of future workshops
- Train for technological and economic knowledge
- Raising awareness of the importance of innovation
- Resource Creation by providing innovation budget
- Joint development of ideas and implementation

(10) **Everything-as-a-Service (XaaS)**

- Connected user experience
- Discover to Renew
- Transaction readiness
- Design for Manufacturing
- People for Growth
- Order for Success

→ **Add-on Services**   **B2B2C**   **B2C**   **B2G**

Technology Ecosystem

*These platforms are strong offering at least two of the other categories

Our Working Model

Core Competency

Leading in Virtual Augmentation with Applied Intelligence (AI) team.
We use cloud-based AI and ML, data warehouses, and cloud-based analytical tools to help our customers become data-driven companies in all aspects of their market.

Goals & Tasks

Our knowledge is based on years of experience modernizing analytical platforms and designing next-generation AI and ML solutions that have a positive effect on the market.

Our Product

	Description of the Project	Key Metrics	Timeline
LMS-LXP/LEP Platform	A modern user interface and improved user experiences as well as gathering modern expectations around social interactions and the use of data to drive relevant users.	DigiLearn, e-Certification Cloud Classroom Learner Experience Simulating Visualisation	8 Month
Anti-theft Intelligence System	Adopts the high-int from the advanced technology, computer processing technology, multi-sensor control, and the ICT device be installed in all dimensions.	PoliceTech Security Intelligence People Safety	7 Month
Surveillance Monitoring System	Aims to collect high-quality data using open methodologies, using Free and Open Source Software.Addressing to continuously monitor the area with the cameras	Smart Security Traffic Monitoring Disaster Survey Aerial Observation	10 Month
Vehicle Diagnosys System	Computer-aided tracks and regulates vehicle performance. The system collects information from the power sensors, which can then use to regulate or alert the problems to user.	Vehicle Technology Machine Diagnosis Risk Measurement	10 Month
Health Screening System	The System involves monitoring patient's vital information remotely through health history records to doctors and permission to the primary diagnosises.	Health Consultation Primary Diagnosis Disease Monitoring	Ongoing

Innovation-at-Work

Encouragement of workplace innovation not only helps businesses stay ahead of the competition and protect their bottom lines, but it also makes for happier workplaces, with greater levels of employee satisfaction and retention.
